CAFS Retrofit Installation Class

This is a 40 hour technician level class which will cover the complete installation of a complete Compressed Air Foam System on an apparatus. The class will include both classroom didactic and practical hands on activities. During the class the students will install a CAFS on an apparatus and an Foam Proportioner on a second apparatus. The class is appropriate for Shop Managers and Technicians who are currently or plan to begin installing CAFS. It is also appropriate for Technicians who service diagnose and repair CAFS. Topics will include: 1) CAFS and Foam Proportioner theory 2) installation tips, tricks, and procedures 3) troubleshooting and diagnosis 4) maintenance and system repair.
